## E. X. FUNCTION

### The Overview

The E.X. Function is digital care taker for those specifically with Autism who struggle with executive functions but can be used for a wide variety of of conditions/disables.

It is an interactive app which allows users to program their daily routines. The app is synced with a smart watch and device for the patients home. The software can scan patients face and teeth for confirmation of function. It is reminder for medication, exercise, executive functions, hygiene, and most importantly an interactive friendly companion.

The data, much like the Comcode Distributor is sent to physicians, guardian and caretakers. This system not only provides a comprehensive treatment for independent living but data that will be invaluable to a variety of diseases like the Comcode Distributor.
