Candidate Selection Process Tool (CSPT)

Over the past four years we have witnessed the radicalized political parties, essentially replacing religion with the domination of Republicans and Democrat with an absolute disregard of one's own personal life.

This selection process will be used at polling places to assist in the voting process. The tool will include a series of questions which voters would answer based on their views on the issues and policies. It would also ask users to place weighted values on all of the issues.

Based on their responses, the voting machine will place votes for the candidates that are most closely aligned to their personal views. This would be used in National, State, and Local elections and would also assist voters in selecting their stances on Propositions, Measures, and other legislative changes.

After voting, individuals will be sent extensive information regarding issues that are important to them and along with resources that may be useful for them and their families. It is important that citizens remain abreast of the latest developments in government.
