Zeppelin Intelligencer Cell Explorer

Overview

Zeppelin Intelligencer Cell in a aircraft designed entirely of transparent titanium. The Zeppelin Intelligencer is designed to fly below and above public aircraft flying zones. The Zeppelin Intelligencer is designed to be undetectable by the shelling that overlaps every element of its design.

If foreign spy crafts are detected, the Zeppelin Intelligencer can extract information by The Zeppelin Intelligencer Laser. The Zeppelin Intelligencer Laser is designed to penetrate and intercept signals, stronger than traditional telecommunication and satellite methodology.

The Zeppelin Intelligencer Laser technology can be routed by overlapping traditional and current telecommunication and satellite technologies. It is an integrated technology which can adapt as needed.

The Zeppelin Transparent methodology can be applied to any source of material for combat, monitoring and extraction.
