Digital Licensing

Overview

Digital licensing + (plates) and GPS for motor vehicles. Digital licensing will alleviate the need for in-person with the addition of biometrics. DMV registration. Digital license plates allow law enforcement to run digitalized tags with ease and also rendering tag theft obsolete.

The GPS system built within the tags or perhaps even the model with some manufacturers, will allow the location of stolen/missing vehicles and person(s) to be retrieved with ease. If utilized by manufacturers,

the vehicle can be shut off remotely when in financial default or in the event of a high-speed chase. DMV locations can be fashioned into automated systems which will administer driving tests around an obstacle course-like exam. Written exams can be held inside with a single administrator.
