**Homeland Security Cyber Compliance  
for Social Media Management  
regarding Government Entities Media Platform  
(Securimedia)**

**Overview**

Social Media accounts representing or acting on behalf of government entities (homeland security, us army, etc.) and vendors must operate by third-party management. This is an essential operational security compliance procedure to prevent access to overall enterprises.

This operational tactic acts as a physical firewall by prohibiting any access to areas outside of united states and relationships on behalf of self-interests of proprietors.
