## The Department of Defense

### Quantitative Strategic Operation Defense System

(Q.S.O.D)

#### Overview

The quantitative strategic operation defense system trains military agents on defense responses using Quantum Sequence Triplication and Quantum Operation Supremacy methodology.

The program analyzes various combat sequences from classified military footage information data, research information data, game theory ideology and Nash Equilibrium for optimum military strategical defensive as well as offensive outcomes in an interactive A.I interface with a training pod.

The system is virtual reality-based simulation in pod, equipped with weather, defense, offensive, and opposite reaction, and real-time outcome for military training.
