IAForce Software: Process, Policies and Procedures

Overview

Every branch of law enforcement is required to use IAForce Software. This software has a shared database that is powered by A.I., which still mandates officer oversight. Access controls for differ between agencies.

This database allows communication and cross-referencing work to run smoother within agencies, allowing access to detailed information regarding crimes, evidence, and suspects.

IAForce offers Retroactive A.I. Evidence linking of prior digital evidence which required advancements which were not available at the time, such as in cases with DNA evidence.

The hardware of cellphones, laptops and other devices with hard drives are uploaded into the system database for A.I. Evidence mapping used in Cyber-Microexpressions. This can confirm alibies, location, messages, GPS locations, contact logs and interactions, keyword searches related to the crime with accurate precision.

- Statewide Records
- Criminal Profiling
- A.I. Arrest Patterns
- Arrests in other states
- DNA and Health Records
- Automatic DNA matching for Cold Cases
- Court Records
- Visitor Log Tracker
- Provides Suggestions for cases with parallel information.
- Every conviction result in a mental health evaluation and sentence to counseling. Building a separate wing within jail for the mentally ill prisoners who require impatient care vs. traditional incarceration.
